For Immediate Release

FATHOM™ IS NAMED TO THE 2014 GLOBAL CLEANTECH 100, RECOGNIZED AS A TOP PRIVATE COMPANY IN CLEAN TECHNOLOGY

PHOENIX – October 6, 2014 –Global Water Management, LLC (“FATHOM”) announced today that it was named in the prestigious 2014 Global Cleantech 100, produced by Cleantech Group, whose mission is to connect corporates to sustainable innovation through the i3 market intelligence platform, expert consulting services, and global events.

The Global Cleantech 100 represents the most innovative and promising ideas in cleantech. Featuring companies that are best positioned to solve tomorrow’s clean technology challenges, Global Cleantech 100 is a comprehensive list of private companies with the highest potential to make the most significant market impact.

“We are honored to be selected as one of the 100 most promising cleantech companies in the world,” said Trevor Hill, Chief Executive Officer of FATHOM. “Water utilities are facing ever-increasing challenges to do more with less. Our mission is simple – enable water utilities big and small to unlock the power of the data in their utility to manage one of our most precious resources more efficiently and more effectively. By breaking down the traditional industry limitations and providing economies of scale, FATHOM allows water utilities to enhance water utility revenue, save money, and conserve water while empowering and delighting their customers.”

“The Global Cleantech 100 represents the most inspiring array of entrepreneurs across the cleantech space that are at the forefront of innovation,” said Sheeraz Haji, Cleantech Group’s CEO. “It is a true honor to gather with the global cleantech community every year to recognize and celebrate the achievements of each of the top 100 companies as they continue to solve tomorrow’s energy and resource challenges and redefine sustainable innovation.”

This year, a record number of nominations were received: 5,995 distinct companies from 60 countries. These companies were weighted and scored to create a short list of 327 companies. Short-listed nominees were reviewed by Cleantech Group’s Expert Panel, resulting in a finalized list of 100 companies from 17 countries.

“The Global Cleantech 100 each year provides us with invaluable insight into which companies key market players think are most likely to have a significant impact in the next 5-10 years,” said Richard Youngman, Cleantech Group’s Managing Director, Europe & Asia and creator of the program. “How the composition of the Global Cleantech 100 list changes over time is revealing of key megatrends and hot sub-sectors – and helps us all get a view on the future.”

About FATHOM

Developed by a water and wastewater utility, FATHOM is an integrated suite of advanced technologies proven to increase revenue, decrease costs and bring heightened efficiencies to water utilities. Our proven, rapidly deployable, highly scalable, cloud-based, Software as a Service (SaaS) solutions are changing the way utilities acquire, analyze and use data to optimize operations and improve customer service. Through our integrated,

geospatial platforms – FATHOM CIS, FATHOM U₂You with FATHOM Mobile, FATHOM MDM and FATHOM AMS – utilities and their customers have the information they need and want at their fingertips. With over 3.75 million meters on FATHOM, there is strength in numbers.
